Straight, textured filaments

# LIGATURF MOTION PRO

## FOOTBALL - MULTISPORT

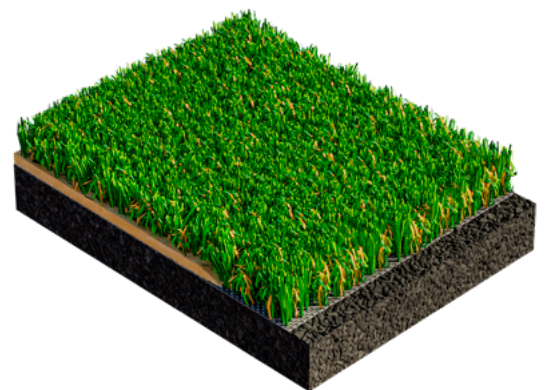

The new Polytan LigaTurf Motion Pro combines the advantages of three different filaments to deliver perfect playing comfort, durability and easy care in one product: The straight, gently protruding LigaTurf Legend Pro fibres result in a stunning appearance and a soft feel, providing the ideal ball-rolling characteristics. The textured filaments of the tried-and-tested LigaGrass Pro system bring stability and traction into play. A third component gives the new LigaTurf Motion Pro its lush, voluminous feel: the textured fibres of the extra fine and soft Synergy yarn.

Nothing can dampen the enjoyment of professionals and amateurs alike on the sand-weighted artificial turf system. Our new multipurpose turf, which is free from sand-rubber filling, is durable and UV-resistant. TriColour fibre colours ensure an extremely natural aesthetic, while CoolPlus pigments reduce surface heating. Thanks to the exclusive PolyCoat PU coating with TuftGuard function and a new base with Interweave Stabilization Technology, we have not only reduced the overall weight – and therefore the environmental impact of manufacturing and transporting the turf – but have also increased its dimensional stability.

## PROPERTIES

- Unfilled turf system\*
- Three filaments with 100 % monofilament technology
- 100 % PolyCoat coating with TuftGuard function
- Exclusive Polytan 100 % PE composition
- Exclusive Polytan PreciTex texturing
- Over 500,000 filaments per m<sup>2</sup>

\*The turf is filled with approx. 15 kg/m<sup>2</sup> sand to secure it on the elastic layer.

LIGATURF MOTION PRO

## AREAS OF USE

- Amateur and professional clubs
- Training facilities
- Multisport and school facilities
- Communal facilities
