Unfilled turf

POLIGRAS TEAMPLAY

HOCKEY

With over 1.25 million filaments per square metre, Poligras TeamPlay opens up new dimensions in hockey. The extremely thick and uniform multidirectional surface of the water-based turf system takes ball-rolling accuracy and speed to a new level, allowing for a fast-paced, precise game. Meanwhile, Polytan's PreciTex technology ensures exceptional turf volume and extreme durability.

Despite its robustness, Poligras TeamPlay provides a soft playing surface that not only feels pleasant, but also reduces the risk of injury among players. Thanks to Polytan CoolPlus technology, the turf does not overheat. This ensures cooler temperatures on the pitch, even under intense sunlight, while reducing water consumption. Like all hockey turf products from Polytan, Poligras TeamPlay meets all the international requirements of the International Hockey Federation (FIH).

POLIGRAS TEAMPLAY

FIH GLOBAL SUPPLIER
polytan

PROPERTIES

- Eight monofilaments with approx. 185 µm fibre thickness
- Over 1.25 million filaments per square metre
- Filament weight of approx. 7,400 dtex
- Exclusive Polytan CoolPlus function
- Exclusive Polytan PreciTex texturing
- Exclusive Polytan 100 % PE composition with ENTANGLEMENT technology
- MultiBack backing construction

AREAS OF USE

- Professional hockey facilities and stadiums
- Hockey training fields
